Witcher 2 was one of the games that tempted me to update my PC, but now that it is out on x60 I can save myself some money and buy it on console.

Intruiging story, politics, women, hard choices, amazing graphics, awesome protagonist. I could go on and on and on. But I won't. Instead, I'm just gonna play this awesome game. And if you like one or more of the above: so should you.

Sneak Preview

A man with short brown hair and glasses, wearing a brown jacket over a light blue shirt, stands on the left side of the frame. He is looking towards the right, over a chain-link fence. Behind the fence, a large, dark, industrial structure, possibly a wind turbine or a large piece of machinery, is visible against a dark, cloudy sky. The overall atmosphere is mysterious and industrial.
